EDUCATION

De La Salle University, Dasmariñas BS - Computer Engineering	Aug 2021 — Aug 2026
Lyceum of the Philippines, Cavite TVL - Information and Communications Technology	Jun 2018 — Jun 2020

PROJECTS

Line Following Robot PIC 16, Stepper Motors • Developed PIC16 firmware via register manipulation for real-time sensor processing and autonomous navigation. • Implemented NEMA 17 motion control using micro-stepping to maximize torque and trajectory accuracy.	Oct 2025 — Dec 2025
Conveyor Belt System Arduino • Designed DC motor control circuits, optimizing torque and speed for reliable material handling. • Developed automated sorting logic to process 20+ items per minute with 99% accuracy.	May 2025 — Jul 2025
Vision Guard: Live Person Detection & Counting System Python, YOLO, OpenCV • Engineered a real-time YOLO/OpenCV system to detect and count individuals from live video feeds. • Optimized image capture for \$<200ms\$ latency, achieving a 98% detection accuracy rate in live testing.	Feb 2025 — Mar 2025
Web Application Thesis Registration System PHP, MySQL, JavaScript • Developed full-stack academic platform (PHP/MySQL) to streamline registration for students and faculty. • Designed normalized RDBMS, reducing data redundancy by 30% and boosting query speeds by 40%.	Nov 2024 — Dec 2024

CERTIFICATIONS

Deep Learning 101: Understanding Neural Networks DLSU - D Computer Engineering Dept	2025-03
Microsoft Azure Seminar: Cloud-Based Database Solutions DLSU - D Computer Engineering Dept	2025-03
PLC Programming & Logic Design DLSU - D Computer Engineering Dept	2025-03
Open Standard SIP Based Telephone System DLSU - D Computer Engineering Dept	2025-03

EXPERIENCE

Student Intern New Era Signs & Graphics	Feb 2019 — Apr 2019 Dasmariñas Cavite
• Managed and scheduled print production and logistics for client deliverables, ensuring on-time delivery for over 50 projects.	
• Optimized vector rendering, reducing material waste by 15% during precision cutting.	

SKILLS

Programming Languages: Python, JavaScript, TypeScript, C++, Java, C, SQL, PHP
Frameworks & Libraries: React, Flutter, Node.js, OpenCV, YOLOv8, TensorFlow, Arduino, MPLAB Harmony
Developer Tools: VS Code, Git, Figma, Android Studio, EagleCAD, MPLAB X IDE
Cloud & DevOps: Microsoft Azure
Specialized Technical Skills: Deep Learning, Computer Vision, PCB Design & Fabrication, Embedded Architecture
